1431 Grosvenor Street Oakville, ON  
[odogbajeffrey@gmail.com](mailto:odogbajeffrey@gmail.com)  
(437) 999 5958

## PROFESSIONAL EXPERIENCE

### **Freelance Full Stack Developer**, Covenant Life Ministry, Canada, *April 2019*

- Communicated with a client regularly by email to discuss about requirements and get feedback.
- Designed and developed entire User Interface of a reservation booking system using web technologies such as HTML, CSS, Bootstrap and jQuery.
- Created functions to support business logics from client-side and admin-side using C# on the .NET Framework.
- Implemented the repository pattern to manage data for appointments, clients and else.
- Checked user authorization for accessing specific pages to manage appointments.

## ACADEMIC PROJECTS

### **Course Registration System Project** <https://github.com/JeffreyOdogba>

- Collaborated with a team member to build a course registration application for students.
- Created web pages using C# embedded in HTML and rendered by Razor on the .NET MVC Framework.
- Implemented features including enroll, swap, drop courses as well as login.
- Used a variety of techniques to access data, such as LINQ to Entities and Entity Framework.

### **Beer Store Mobile Project** <https://github.com/JeffreyOdogba>

- Work on a team to develop a mobile-based commerce application is consist of dynamic web contents.
- Focused on user familiarity by categorizing product pages by beer types as well as adding a cart page on which customers can modify their shopping lists before checkout.
- Fetched Beer data in JSON format using Ajax.
- Added a feature that the number on the cart icon shows the number of beers which a customer has chosen in real time using JavaScript.
- Used Google Maps API to show the store location customers are picking their orders up.
